lampada da terra
design Antonio Casaburi

Un'attento studio della luce ne esalta le forme, e garantisce un'adeguata illuminazione ambientale. La lampada da terra "Elica" è dotata di un duplice sistema di illuminazione:

- dal suo nucleo, strisce di LED illuminano le "lame" di cui è composta, dando luogo a variazioni cromatiche e incantevoli giochi di luci ed ombre.
- un faretto LED, posto in sommità, proietta un fascio di luce verso l'alto, avvolgendo di luce diffusa l'ambiente circostante.

A careful study of light exalts its forms, and ensures adequate illumination environmental. The floor lamp "Elica" is equipped with a dual lighting system:

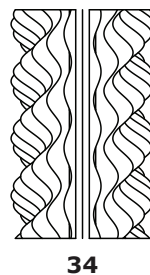

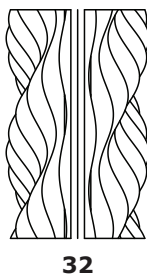

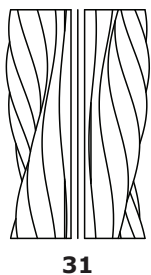

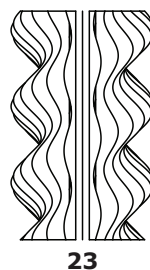

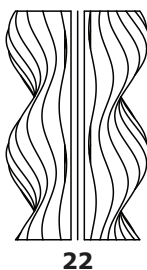

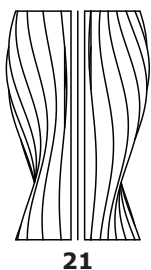

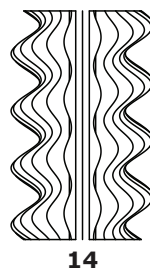

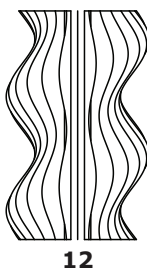

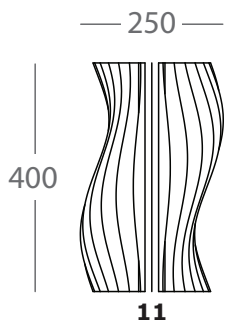

- from its core, LED light strips radiate the "blades" of which it is composed, giving rise to lovely chromatic variations and games of shadows on the surrounding surfaces.*
- a LED spotlight, located at the top, projects a beam of light upwards, wrapping of diffused light the surrounding environment.*
